Introduction

The MENA Transition Fund was established as a Financial Intermediary Fund (FIF) in 2012 at the request of the Deauville Partnership with Arab Countries in Transition. The objective of the Transition Fund is to improve the lives of citizens in transition countries in the Middle East and North Africa, and to support the transformation currently underway in several countries in the region by providing grants for technical cooperation to strengthen governance and public institutions, and foster sustainable and inclusive economic growth by advancing country-led policy and institutional reforms.

The World Bank serves as the Trustee for the Transition Fund. The Trustee provides administrative and financial services to the Transition Fund Steering Committee and donors, by receiving contributions from donors to the Trust Fund, investing liquid assets pending cash transfer, and transferring funds to the Implementation Support Agencies (ISAs). Working closely with the Transition Fund Coordination Unit, the Trustee also records funding decisions made by the Steering Committee.

The Trustee periodically provides to the donors and the Steering Committee reports on the financial status of the Trust Fund.¹ The information contained in this report is prepared based on financial information as of September 30, 2016.

¹ The Trustee's financial status reports are publicly available at: www.worldbank.org/fiftrustee

MENA Transition Fund Financial Summary as of September 30, 2016

3. Asset Mix and Investment Income

ASSET MIX

Funds held in trust by the World Bank (as the Trustee) are maintained in a commingled investment portfolio (the “Pool”) for all trust funds administered by the World Bank. On July 1, 2015, the World Bank formally adopted the Conditional Value-at-Risk (CVaR) measure as the risk constraint in the management of trust funds. Funds are managed such that the expected maximum loss, as measured by the CVaR, at the portfolio’s investment horizon, is not to exceed 1% with 99% confidence.

Asset mix allocation as of September 30, 2016

Note: The negative position in swaps is primarily due to changes in foreign currency exchange (FX) rates in cross currency basis swaps. Such swap instruments are used to implement currency hedges on bond positions within the portfolio and the negative allocation to cash and cash equivalents is a result of repurchase agreements that are used to purchase yield enhancing securities.

INVESTMENT RETURNS

The Transition Fund funds are invested in a short horizon portfolio of the World Bank’s Trust Fund investment pool. This portfolio majorly comprises investments in government securities, Agency and corporates with an investment horizon of up to one year. The Transition Fund liquid portfolio (which totaled approximately USD 35.4 million as of September 30, 2016) earned approximately USD 1.8 million in investment income since inception. In addition, the investment income received from MDBs is USD 0.1 million.

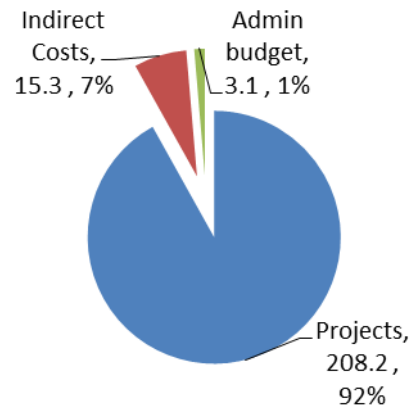

4. Cumulative Funding Decisions
